Address: 4111 NW 22nd Ave Miami FL 33142

Type: Routine **Date:** 05/06/2025

Counselor Comments

Training: All in-service trainings must be completed for the fiscal year beginning July 1 and ending June 30.

Effective May 2019, permanent or stationary playground equipment must have a falluse zone that extends a minimum of six feet in all directions from the perimeter of the equipment. All types of ground cover must be maintained to provide resilience and reduce the incidence of injuries to children in the event of falls. Its important to note if the permanent or stationary playground equipment is moved or replaced, and the program has been grandfathered into the standard and received a waivervariance, then the standard would apply and six feet of use zone must be provided. Any new equipment added would be required to have the six feet of use zone in all directions from the perimeter of the equipment.

Effective December 31, 2021, the facility shall maintain the following number of child care personnel with the CPR certification and first aid training that are on site at the facility at all times children are in care. For child care personnel to count to meet requirement in the below chart, they shall be child care personnel assigned to provide direct supervision of children in care:

For 0-25 children, 3 personnel

For 26-50 children, 4 personnel

For 51-75 children, 5 personnel

For 76-100 children, 6 personnel

For 101+ children, 7 personnel

A Director, on site when children are present, with pediatric CPR certification and first aid training may qualify as one of the child care personnel for purposes of meeting the above requirements. Documentation of pediatric cardiopulmonary resuscitation (CPR) certification and first aid training must be kept on file and available for licensing to review.

Effective Jan. 9, 2022, all vehicles used by child care facilities and large family child care homes to transport children must be equipped with a reliable alarm system approved by the department which prompts the driver to inspect the vehicle for children before exiting the vehicle.

A vehicles alarm system works in a few specific ways and must be used according to state and local requirements. Approved alarm systems must meet the criteria established in the CCF Handbook Section 2.5.4 F.1. Alarm systems installed according to the manufacturers instructions prior to October 1, 2021, will be deemed to satisfy this requirement if they meet the criteria set forth in 2.5.4.F.1. above. Under this allowance, the existing alarm system must always be properly maintained in working order. Should at any time the alarm system require replacement, the new system must be selected from the Departments approved list referenced in 2.5.4 F.2. For further information on the safety alarm, including a list of approved alarm manufacturers, please refer to our website (www.myflfamilies.comchildcare) under the Child Care Alarms for Transportation tab.

Radon Testing Requirements Florida Statute 404.056 and Chapter 64E-5 Part XII B require that indoor radon levels must be measured in licensed childcare facilities located in counties designated within the Intermediate or Elevated Radon Potential areas. For Miami-Dade County, all licensed facilities, excluding those in single family homeduplexes, require testing. For Monroe County, NO state required radon testing. Tests must be completed within 1 year after the childcare facility starts operation. These mandatory tests are to be conducted in accordance with Florida Statute 404.056, Chapter 64E-5 Part XII B, and Mandatory Radon Testing Protocols and reported to the Department of Health on forms DH1777 or DH1778. Please refer to link that includes a map of counties and testing requirements: <http://www.floridahealth.govenvironmental-healthradonmapsindex.html>
